

FIFS SPORTS DATA GAMEATHON 2.0

Overview

FIFS (Federation of Indian Fantasy Sports) in association with Ministry of Information and Broadcasting, GOI is organizing **Sports Data Gameathon 2.0** on **world's biggest cricket league - the Indian T20 League**. Join us for an exciting event that blends innovation, technology, data-science and collaboration in the realm of fantasy sports, gaming technology, and skill-based competitions.

The **Sports Data Gameathon** is a unique AI modelling competition designed to challenge the brightest minds from India's premier technological institutes. Participants will harness the power of AI and ML to develop predictive models for creating winning fantasy cricket teams for the Indian T20 League matches.

INDIAN T20 LEAGUE TIMELINE

MARCH 22ND - MAY 18TH

MATCH 1 TO 29 (MARCH 22ND - APRIL 13TH)

MODEL TESTING & PRACTICE

MATCH 30 ONWARDS (APRIL 14TH - MAY 18TH)

COMPETITION STARTS OFFICIALLY

Interested teams are required to **fill this form by March 20th, 2025** and we will get back to you with confirmation of participation.

Why Participate?

Showcase Talent:

Demonstrate your expertise in AI/ML within the dynamic world of sports. Hands-on experience in real-world data analytics

Career Opportunities:

Compete and gain exposure at national level

Engage with Experts:

Learn from industry leaders in sports analytics and AI

Make an Impact:

Contribute to the evolution of AI/ML in the Indian sports industry, enhancing athlete performance and fan engagement

Prizes

TOTAL (INR)
PRIZE MONEY

₹ 25,00,000/-
+ EXCITING SURPRISES

1ST PLACE
₹ 10 LACS

2ND PLACE
₹ 5 LACS

3RD PLACE
₹ 3 LACS

4TH PLACE

₹ 1 LACS

₹ 1 LACS

9TH PLACE

₹ 1 LACS

10TH PLACE

₹ 1 LACS

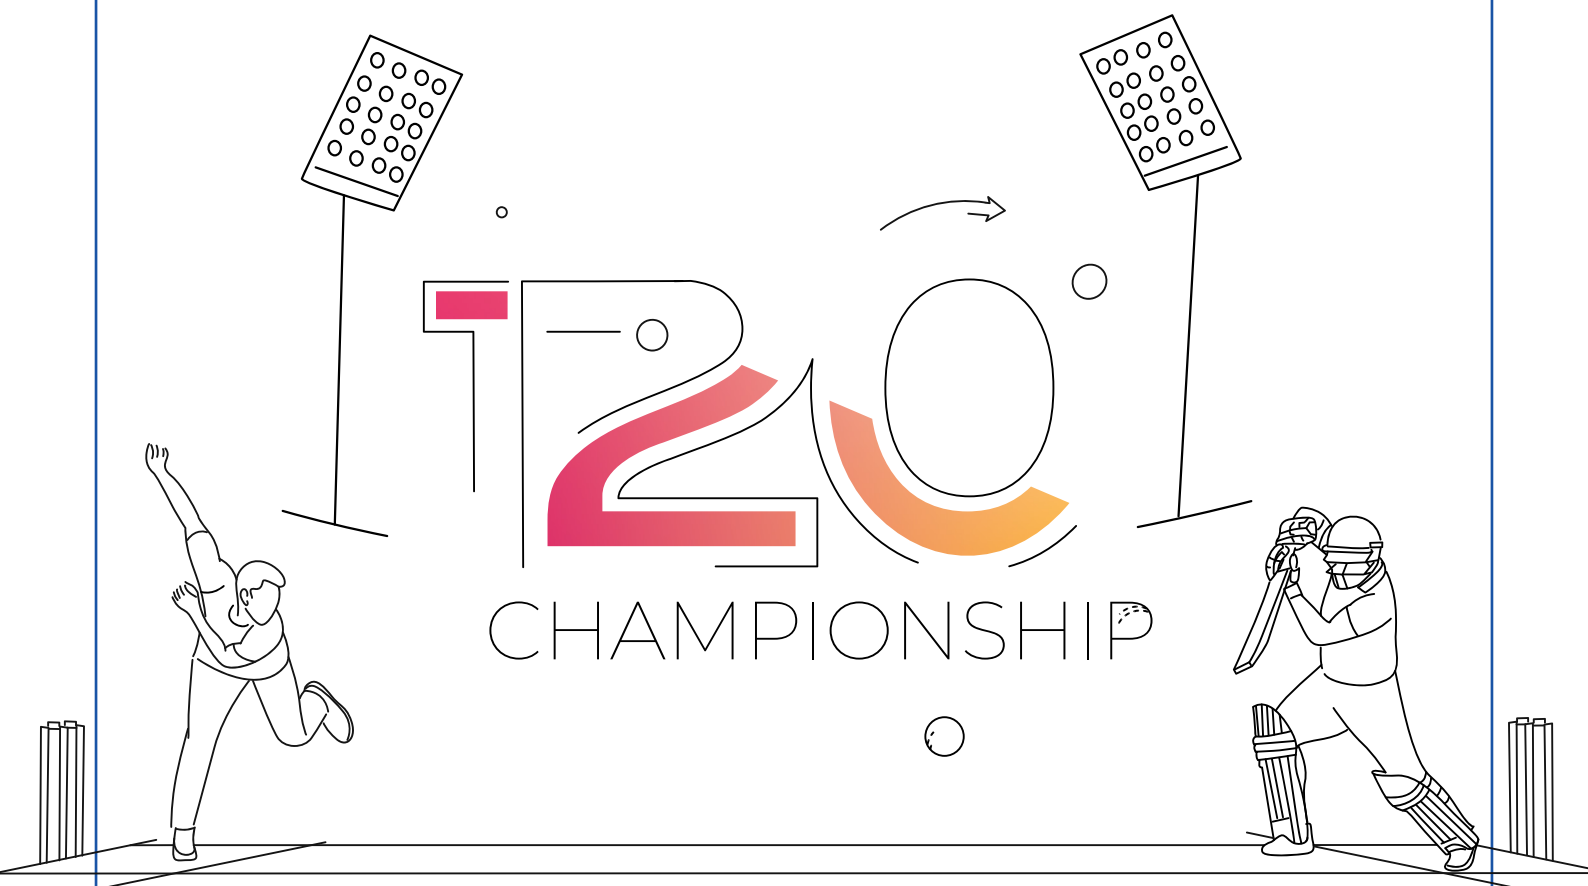

1. Problem Description

Build an AI/ML based model to develop a winning strategy for a season-long fantasy sports contest, hosted on the Indian T20 League 2025 (starting match no. 30 of Indian T20 League on April 14th, 2025). The objective will be to build AI models that generate teams which maximize fantasy points for each individual match during the Indian T20 League which will be cumulated across all matches of the tournament in a leaderboard to determine the winners.

The participating teams must ensure that their models are able to select and draft players for their respective fantasy teams for each individual match during the Indian T20 League. The model must take into account historical player performance, contextual match factors (such as pitch conditions, weather, venue record, toss, playing lineup etc.) and other game-related aspects to suggest an optimum team-selection strategy for each match. The model must also adhere to the gameplay constraints, such as player credits, team composition, while generating their respective outputs. The detailed gameplay rules are available under Section 2 - "**Platform & Gameplay Details**".

The first 29 matches of Indian T20 League are meant for practicing and teams are encouraged to keep testing and improving the quality of their models. The Gameathon will officially kick-off on 14th April, 2025 from Match no. 30 of the Indian T20 League.

The participating teams will also be required to submit a docker model for us to validate the models and outputs generated. More details about the model docker are available under Section 3 - "**Technical Details**".

2. Platform & Gameplay Details

WHAT IS FANTASY SPORTS?

Fantasy Sports is a skill-based game where you create a virtual team of players for an upcoming real world match based on pre-specified constraints like team composition. Fantasy Points are earned by players on the basis of their actual performances in the match. For e.g., players earn points for scoring runs, taking wickets, etc. (cricket), scoring goals, making assists, etc. (football) and similar actions for other sports.

PLATFORM

The fantasy sports contests will be hosted on Dream11 in accordance with its gameplay rules. The participants will need to create an account on Dream11 to be able to enter their teams. The participants will be added to a private group, which will have a dedicated leaderboard that is updated after each match based on the fantasy points accumulated by each participant.

For details on onboarding and joining the contest we will come back with details once participation is finalized.

GAMEPLAY RULES

1. TEAM COMPOSITION

- The fantasy team should consist of the same number of players as the real-life teams i.e. 11 players for cricket
- The fantasy team must consist of at least 1 player from each team
- The fantasy team must consist of at least 1 player from each player category i.e. wicketkeepers, batters, all-rounders and bowlers

3. BACKUPS

- Participants can choose up to 4 backups
- Backups will only replace players that are not announced in the starting 11
- Backups must fulfil all rules mentioned above under the heading **“Team Composition”**
- Example - if you have only chosen 1 bowlers in your 11 and that bowler is not announced and none of your backups are bowlers, then backups will not apply as create team rules are being invalidated

2. BUDGET AND PLAYERS CREDITS

- Every player is assigned a certain credit value
- All participants are allotted a total of 100 player credits to select the 11 players for their respective teams

4. FANTASY POINTS SYSTEM

- You can find the fantasy points system [here](#) - **Link**
- Please refer to ‘Cricket’ section -> T20 tab for the fantasy points system applicable on the Indian T20 League

3. Technical Details

DATA PROVIDED

- You can use the following data/stats repository with detailed match wise player stats
 - a) Cricinfo stats repository - [Link](#)
 - b) Cricsheet - [Link](#)
- Participants are free to use any additional/alternate publicly available data sources and sports websites as they deem fit and valuable for prediction

SUBMISSION REQUIREMENTS

Submission-1: Register your team's interest

Kindly fill this form and we will get back to you with confirmation of participation - [Link](#)

Submission-1 Timeline: By March 20th, 2025 11.59 PM (no registrations will be accepted beyond this point)

Submission-2: Complete team details & participant declaration

We will reach out to you for this post confirmation of participation

Submission-3: Docker File for model evaluation

You will need to submit a Docker File to validate the models and outputs generated. This interface will allow a way to validate whether the team combination recommendations are generated from a model. No team selection should happen on a manual basis.

Docker File Specifications:

- Input :** a) All Squad Data & Playing XI Lineup input provided by Dream11. Depends on date the docker file is run, it should consider the Indian T20 League match on that day
- Output :** Predicted 11 players for the fantasy team in a csv in the format below:

Player name	Team	C/VC
R. Sharma	Ind	C
J. Bumrah	Ind	VC
Pat Cummins	Aus	NA

- We will validate whether the team you entered into the contest on a given match day, matches the team generated from the Docker file

Important instructions:

- Please don't make any changes to the code repository post the submission of the docker file, the model thereafter should just fetch the latest data from the linked sources and produce the recommended fantasy team

3. Technical Details

SUBMISSION REQUIREMENTS

- Joining the contests with a team other than the ones that can be replicated through docker file will lead to disqualification
- If any changes are made post docker submission, it will result into a different output at our end vs what you submit in the contest, and hence lead to disqualification
- Make sure we are able to see the code repo linked to your docker file
- If your model utilizes playing XI data, the docker model should produce the output depending on whether Playing XI for the match has been declared or not
- Make sure you check that the docker file works on a few other systems at your end, so that no issues happen at our end during validation
- Feel free to apply your creativity in leveraging existing open source models, make sure to disclose and credit what you leverage. Using an entire pre-built solution would not be permitted
- Strictly don't use any paid APIs, code base will be checked to ensure that

Submission-3 Timeline: 20th April, 2025 11:59 PM

Submission-4: Team lock-in before start of each match of Indian T20 League (from match no. 30)

- The team lock-in deadline is till the first ball is bowled - it will need to be done for each match from match no. 30 onwards on our member platform Dream11 as explained in previous section
- You need to finalize your team, captain & vice-captain - please note the selection for each match should be done basis the output of your model and solution and not to be done randomly
- You can factor-in the toss result & playing XI lineup to predict your output
- Dream11 will be providing the list of all squads, player roles and credits
- Dream11 will be providing the PlayingXI data for each match once it is announced

Submission-4 Timeline: On an ongoing basis for every Indian T20 League match from 14th April - 18th May, 2025

JUDGING CRITERIA

- Your daily fantasy team submission must exactly match the output of your Docker file
- Upon successful validation, the final rankings at the end of Indian T20 League basis the fantasy points scored from your team selections over the course of the tournament will define the winners
- Results of the above steps will only be shared post the completion of Indian T20 League

3. Technical Details

NEXT STEPS

Action Item	Details	Timeline
Register your interest (Interested student teams can fill this quick form)	Form Link	March 20 th , 2025
Confirmation of Participation		March 21 st , 2025 (On a rolling basis)
Model Building, Refinement & Improvement (Teams can continue to test & improve their models)	till Match no. 29 of Indian T20 League	till April 13 th , 2025
Gameathon Kick-off (Match-by-match team selection on dream11 app)	from match no. 30 of Indian T20 League	April 14 th - May 18 th , 2025
Model Docker Submission		To be communicated later
Announcement of Winners		June 1 st , 2025

TERMS & CONDITIONS

Eligibility:

- Teams must consist of 4-7 members from a recognized Indian educational institution
- Only current full-time students (undergrad, master's, PhD) can participate.
Disqualification for non-compliance
- All team members must be from the same institution - we will request for identity details

Submission Guidelines:

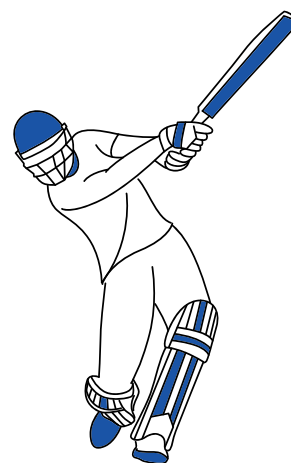

- All submissions must adhere to the guidelines and timeline provided by FIFS, wherever specified

Evaluation and Disqualification:

- All rights related to evaluation, participant selection, and disqualification reside solely with FIFS
- If any plagiarism is found in the models or teams colluding with each other, teams will be disqualified

Participation Rules:

- Participants must abide by the rules communicated by FIFS
- Any violation of guidelines may result in immediate disqualification

3. Technical Details

TERMS & CONDITIONS

Prizes and Awards:

- Prize amounts are subject to taxation as per government regulations
- Decisions regarding winners are final and binding

Force Majeure:

- FIFS reserves the right to reschedule or cancel the event under extraordinary circumstances

Dispute Resolution:

- Any disputes will be addressed under the jurisdiction of Indian courts

Intellectual Property:

- Any AI models or strategies developed during the event remain the property of the students

FAQS

Can more than one team participate from the same institute?

Yes, any number of teams can register from an institute. One individual should only be part of only one team

Which platform will be used to create our team?

The technology of the tournament is powered by one of our member organizations - Dream11, one of the leading fantasy sports players in India

The accounts and teams will be registered on Dream11 - the details of which will be shared as we confirm the participation

How will the prize money be distributed?

Within 10-20 days of the completion of the event on 18th May, 2025 once we complete the model evaluation

We will reach out the winning teams regarding the details and mode of disbursement

3. Technical Details

FAQS

Is there any advice for data and strategies which are recommended?

Students have the freedom to decide and choose which techniques, features, variables and models that are used

However we will organize a 1-hour guidance session with our expert Prof. Misra who can provide some high-level guidelines and recommendations

Students are free to use any further publicly available data source which can aid the development of the models

Is there any registration fee or charge?

It is absolutely free of charge - all of you have to do is build quality model to make winning teams and be at the top of leaderboard

About FIFS :

Federation of Indian Fantasy Sports (FIFS) is India's first and only dedicated Fantasy Sports industry body established to protect consumer interest and create standardized best practices in the FS industry.

FIFS aims to create a thriving ecosystem for FS users and operators by creating guidelines for a common set of practices and setting standards of operations to protect the FS user and operator interests. FIFS works with key industry stakeholders and liaisons with policymakers to help create a robust governance structure to support the sustained growth of the industry.

Join us in redefining the future of sports through technology! Register now and be part of this exciting journey. All the Best and Innovate Freely!
